## Overall Morningstar Ratings™

Morningstar Category: Intermediate Core Bond

Investor Class ★★★

Morningstar ratings vary among share classes and are based on historical risk-adjusted total returns, which are not indicative of future results.

## Goal and Strategy

Total return primarily through investment-grade, intermediate-term bonds.

## Distinguishing Characteristics

Employs comprehensive risk management designed to maximize return per level of risk. May serve as a primary core bond holding due to its broad bond market diversification and high-quality focus.

## Portfolio Management Team

Name	Start Date	
	Industry	Company
Charles Tan	1994	2018
Robert Gahagan	1983	1983
Jeffrey Houston, CFA	1986	1990
Jason Greenblath	2002	2019
Peter Van Gelderen	2005	2021

## Fund Information

Total Fund Assets	\$6.3B
30 Day SEC Yield (Inv Class)	4.04%
Dividend Frequency	Monthly
Index	Bloomberg U.S. Aggregate

## Risk Measures (3-year)

Alpha (Annualized)	0.06
Beta	1.00
R-squared	0.99
Std. Deviation (Annualized)	6.19
Sharpe Ratio	-0.84

## Expenses and Sales Charges

Class	Expense Ratio (%)
Investor	0.59
I	0.39
A (4.50% Initial Sales Charge)	0.84
C	1.59
R	1.09
R5	0.39
R6	0.34

Expense ratio is as of the fund's current prospectus. The I Class minimum investment amount is \$5 million (\$3 million for endowments and foundations) per fund. A contingent deferred sales charge (CDSC) of 1% for A Shares is only charged at redemption within the first year on purchases over \$1MM. There is no initial sales charge in these situations. C Class shares are subject to a CDSC of 1% and the charges will be imposed on certain redemptions within 12 months. The R and R5 Share Classes are available only to participants in group employer-sponsored retirement plans where a financial intermediary provides recordkeeping services to plan participants.

## Growth of a Hypothetical \$10,000 Investment

American Century  
Diversified Bond  
\$11,347

Investor Class as of 6.30.2023.

Data presented reflects past performance. Past performance is no guarantee of future results. Current performance may be higher or lower than the performance shown. To obtain performance data current to the most recent month end, please visit [www.americancentury.com/performance](http://www.americancentury.com/performance). Investment return and share value will fluctuate, and redemption value may be more or less than original cost. Data assumes reinvestment of dividends and capital gains. Returns for periods less than one year are not annualized.

You should consider the fund's investment objectives, risks, and charges and expenses carefully before you invest. The fund's prospectus or summary prospectus, which can be obtained at [americancentury.com](http://americancentury.com), contains this and other information about the fund, and should be read carefully before investing.

DUE TO MARKET VOLATILITY, CURRENT PERFORMANCE MAY BE DIFFERENT THAN THE FIGURES SHOWN.

Historical performance for the R5 Class prior to its inception is based on the performance of I Class shares, which have the same expenses as the R5 Class.

## A Note About Risk

The value and/or returns of a portfolio will fluctuate with market and economic conditions. The fund's investments in fixed income securities are subject to the risks associated with debt securities including credit, price and interest rate risk. Generally, as interest rates rise, the value of the securities held in the fund will decline. The opposite is true when interest rates decline. There is no guarantee that the investment objectives will be met. Dividends and yields represent past performance and there is no guarantee that they will continue to be paid. The information is not intended as a personalized recommendation or fiduciary advice and should not be relied upon for investment, accounting, legal or tax advice.

Other	0.73

<sup>1</sup>Quality: Describes the portfolio of the fund in terms of the quality ratings of the securities it holds. All U.S. government securities are included in the U.S. government category. Cash and cash equivalents include payable amounts related to securities purchased but not settled at period end. Credit quality ratings on underlying securities of a fund are obtained from three Nationally Recognized Statistical Rating Organizations (NRSROs), Standard & Poor's, Moody's and Fitch. Ratings are converted to the equivalent Standard & Poor's rating category for purposes of presentation. The median rating is used for securities rated by all three NRSROs. The common rating is used when two of the three NRSROs agree. The lower rating is used when only two NRSROs rate a security. A nonrated designation is assigned when a public rating is not available for a security. This designation does not necessarily indicate low credit quality. The letter ratings are provided to indicate the credit worthiness of the underlying bonds in the portfolio and generally range from AAA (highest) to D (lowest). Includes payable amounts related to securities purchased but not settled at period end. Due to rounding, these values may exceed 100%.

<sup>2</sup>Negative weights, when quoted, may be due to open security or capital stock trades at period end and/or unrealized loss on derivative positions as a percent of net assets at period end. Fund holdings subject to change without notice.

Morningstar Rating - Investor Class

Morningstar Category - Intermediate Core Bond	Overall	3 Year	5 Year	10 Year
Rating	***	***	***	***
# of Funds	411	411	379	277

The Morningstar Rating™ for funds, or star rating, is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

Source: Bloomberg Index Services Ltd. Bloomberg U.S. Aggregate Bond Index represents securities that are taxable, registered with the Securities and Exchange Commission, and U.S. dollar-denominated. The index covers the U.S. investment-grade fixed-rate bond market, with index components for government and corporate securities, mortgage pass-through securities, and asset-backed securities.

**Key Terms:**  
**Alpha:** Shows how a fund did relative to what would have been expected given the fund's beta and the performance of the benchmark index. For example, an alpha of 1.4 means that the fund outperformed its estimated return (based on market activity alone) by 1.4%.  
**Beta:** Measures the volatility of the fund, as compared to that of the overall market. The market's beta is set at 1.00; a beta higher than 1.00 is considered to be more volatile than the market, while a beta lower than 1.00 is considered to be less volatile.  
**Duration:** A weighted average of all bond durations in a fund's portfolio. Duration measures the price sensitivity of a bond or bond fund to changes in interest rates. Specifically, duration represents the approximate percentage change in the price of a bond or bond fund if interest rates move up or down 100 basis points.  
**R2 - (R-squared):** A statistic that indicates how much of a fund's fluctuations were attributable to movements in the fund's benchmark index.  
**Sharpe Ratio:** Measures the potential reward offered by a mutual fund relative to its risk level using the fund's standard deviation and its excess return to determine reward per unit of risk. The higher the sharpe ratio, the better the fund's historical risk-adjusted performance.  
**Standard Deviation:** Defines how widely returns varied from an average over a given period of time. A higher standard deviation means a more volatile fund. For example, a fund with a standard deviation of 6 and an average annual return of 10% saw annualized monthly returns fall within 6 percentage points of that average (or between 4% and 16%) two-thirds of the time.  
**Weighted Average Life to Maturity:** The average time in years to receive the principal repayments.
