Money Market: You could lose money by investing in the Fund. Although the Fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. The Fund may impose a fee upon sale of your shares. A Note About Risk

Fund Shares are not guaranteed by the U.S. Government. Interest rate changes are among the most significant factors affecting bond return. In a declining interest rate environment, bond prices rise and the fund may generate less income. In a rising interest rate environment, bond prices fall. There is no guarantee that the investment objectives will be met. Dividends and yields represent past performance and there is no guarantee that they will continue to be paid. Even though the fund is designed to purchase assets exempt from federal taxes, there is no guarantee that all of the fund's income will be exempt from federal income tax or the federal AMT. Specifically, the portfolio managers are permitted at any time to invest up to 20% of the fund's assets in debt securities with interest payments that are subject to federal income tax and/or federal AMT.
