

International Small Cap Equity ETF

Objective

Seeks long-term capital appreciation.

Investment Approach

- Invests in a broad set of non-U.S. small-cap companies, taking into consideration valuation, profitability and levels of investment when selecting and weighting securities.
- Pursues the benefits associated with indexing (diversification, low turnover, transparency and tax efficiency), but with the ability to add value by making investment decisions using information in current prices.
- Efficient portfolio management and trading process that is designed to enhance returns while seeking to reduce unnecessary risks and costs for investors.
- Built to fit seamlessly into an investor's asset allocation.

Performance (%)

	QTR	YTD	1 YR	3 YR	5 YR	10 YR	SINCE INCEPTION
NAV	11.12	-	-	-	-	-	3.51
Market Price	11.01	-	-	-	-	-	3.75
Benchmark	10.60	-	-	-	-	-	2.33

Data as of 12/31/2023. Performance data quoted represents past performance and is no guarantee of future results. Current performance may be lower or higher than the performance data quoted. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than original cost. Returns less than one year are not annualized. NAV prices are used to calculate market price performance prior to the date when the Fund first traded on the New York Stock Exchange. Market performance is determined using the bid/ask midpoint at 4:00 p.m. Eastern time, when the NAV is typically calculated. Market performance does not represent the returns you would receive if you traded shares at other times. To obtain performance data current to the most recent month end, please visit www.avantisinvestors.com. Benchmark performance does not represent the fund's performance. It is not possible to invest directly in a benchmark.

A Note About Risk: Historically, small cap stocks have been more volatile than the stock of larger, more-established companies. Smaller companies may have limited resources, product lines and markets, and their securities may trade less frequently and in more limited volumes than the securities of larger companies. International investing involves special risks, such as political instability and currency fluctuations. Investing in emerging markets may accentuate these risks. There is no guarantee that the investment objectives will be met. Dividends and yields represent past performance and there is no guarantee that they will continue to be paid. The information is not intended as a personalized recommendation or fiduciary advice and should not be relied upon for investment, accounting, legal or tax advice.

DUE TO MARKET VOLATILITY, CURRENT PERFORMANCE MAY BE DIFFERENT THAN THE FIGURES SHOWN.

Exchange Traded Funds (ETF) are bought and sold through exchange trading at market price (not NAV), and are not individually redeemed from the fund. Shares may trade at a premium or discount to their NAV in the secondary market. Brokerage commissions will reduce returns.

You should consider the fund's investment objectives, risks, and charges and expenses carefully before you invest. The fund's prospectus or summary prospectus, which can be obtained by visiting Avantisinvestors.com or by calling 833-928-2684, contains this and other information about the fund, and should be read carefully before investing.

This fund is an actively managed ETF that does not seek to replicate the performance of a specified index. To determine whether to buy or sell a security, the portfolio managers consider, among other things, various fund requirements and standards, along with economic conditions, alternative investments, interest rates and various credit metrics. If the portfolio manager considerations are inaccurate or misapplied, the fund's performance may suffer.

Key Terms: Weighted Average Market Capitalization: The average of the weighted capitalizations of a portfolio's holdings. **Weighted Average Book/Market:** An average book-to-market ratio resulting from the multiplication of each security's book-to-market by its weight in the portfolio. **Weighted Average Profits/Book:** An average profits-to-book ratio resulting from the multiplication of each security's profits-to-book by its weight in the portfolio.
