TICKERS Investor Class: AEDVX | I Class: AEHDX | A Class: AEDQX | C Class: AEDHX | R Class: AEDWX | R5 Class: AEDJX | R6 Class: AEXDX

## Overall Morningstar Ratings™

Morningstar Category: Emerging Markets Bond

Investor Class **\*\*\***

Morningstar ratings vary among share classes and are based on historical risk-adjusted total returns, which are not indicative of future results.

## Goal and Strategy

Long-term total return primarily through investments in emerging markets debt securities.

## Distinguishing Characteristics

Designed to provide broad emerging markets exposure through investments in debt securities. The fund's investment process blends fundamental credit research and top down analysis.

## Portfolio Management Team

Name	Start Date	
	Industry	Company
John Lovito	1986	2009
Tommy Youn	2000	2014
Rajat Ahuja	2004	2021

## Fund Information

Total Fund Assets	\$642.6M
30 Day SEC Yield (Inv Class)	
Subsidized/Unsubsidized	6.13% / 6.10%
Dividend Frequency	Quarterly
Index	50% JPM EMBI Global Diversified/50% JPM GBI-EM Global Diversified

## Risk Measures (3-year)

Alpha (Annualized)	-0.61
Beta	0.80
R-squared	0.93
Std. Deviation (Annualized)	8.68
Sharpe Ratio	-0.51

## Expenses and Sales Charges

Class	Gross (%)	Net (%)
Investor	1.01	0.98
I	0.91	0.88
A (4.50% Initial Sales Charge)	1.26	1.23
C	2.01	1.98
R	1.51	1.48
R5	0.81	0.78
R6	0.76	0.73

Expense ratio is as of the fund's current prospectus. The I Class minimum investment amount is \$5 million (\$3 million for endowments and foundations) per fund. A contingent deferred sales charge (CDSC) of 1% for A Shares is only charged at redemption within the first year on purchases over \$1MM. There is no initial sales charge in these situations. C Class shares are subject to a CDSC of 1% and the charges will be imposed on certain redemptions within 12 months. The R, R5 and R6 Share Classes are available only to participants in group employer-sponsored retirement plans where a financial intermediary provides recordkeeping services to plan participants.

## Growth of a Hypothetical \$10,000 Investment

American Century Emerging Markets Debt  
**\$12,816**

Investor Class as of 3.31.2024.

Statistics are based upon monthly returns. As such, calculations begin with the first full month of performance which is 8/31/2014.

**Data presented reflects past performance. Past performance is no guarantee of future results. Current performance may be higher or lower than the performance shown. To obtain performance data current to the most recent month end, please visit [www.americancentury.com/performance](http://www.americancentury.com/performance). Investment return and share value will fluctuate, and redemption value may be more or less than original cost. Data assumes reinvestment of dividends and capital gains. Returns for periods less than one year are not annualized.**

**You should consider the fund's investment objectives, risks, and charges and expenses carefully before you invest. The fund's prospectus or summary prospectus, which can be obtained at [americancentury.com](http://americancentury.com), contains this and other information about the fund, and should be read carefully before investing.**

**DUE TO MARKET VOLATILITY, CURRENT PERFORMANCE MAY BE DIFFERENT THAN THE FIGURES SHOWN.**

Historical performance for the I Class prior to its inception is based on the performance of R5 Class shares. I Class performance has been adjusted to reflect the differences in expenses between the classes, if applicable.

## A Note About Risk

International investing involves special risks, such as political instability and currency fluctuations. Investing in emerging markets may accentuate these risks. The lower rated securities in which the fund invests are subject to greater credit risk, default risk and liquidity risk. Dividends and yields represent past performance and there is no guarantee that they will continue to be paid. The information is not intended as a personalized recommendation or fiduciary advice and should not be relied upon for investment, accounting, legal or tax advice.

The gross expense ratio is the fund's total annual operating costs, expressed as a percentage of the fund's average net assets for a given time period. It is gross of any fee waivers or expense reimbursement. The net expense ratio is the expense ratio after the application of any waivers or reimbursement. This is the actual ratio that investors paid during the fund's most recent fiscal year. Please see the prospectus for more information.

Returns or yields for the fund would have been lower if 0.03% of the management fee had not been waived. The advisor expects this waiver to continue until July 31, 2024, and cannot terminate it prior to such date without the approval of the Board of Directors. Review the annual or semiannual report for the most current information.

EM Sovereign	74.20
EM Corporate	11.65
EM Quasi-Sovereign	8.16
Cash & Cash Equivalents	3.79
Treasury	2.20

<sup>1</sup>Quality: Describes the portfolio of the fund in terms of the quality ratings of the securities it holds. All U.S. government securities are included in the U.S. Government category. Cash and cash equivalents include payable amounts related to securities purchased but not settled at period end. Credit quality ratings on underlying securities of a fund are obtained from three Nationally Recognized Statistical Rating Organizations (NRSROs), Standard & Poor's, Moody's and Fitch. Ratings are converted to the equivalent Standard & Poor's rating category for purposes of presentation. The median rating is used for securities rated by all three NRSROs. The common rating is used when two of the three NRSROs agree. The lower rating is used when only two NRSROs rate a security. A nonrated designation is assigned when a public rating is not available for a security. This designation does not necessarily indicate low credit quality. The letter ratings are provided to indicate the credit worthiness of the underlying bonds in the portfolio and generally range from AAA (highest) to D (lowest). Includes payable amounts related to securities purchased but not settled at period end. Due to rounding, these values may exceed 100%.

<sup>2</sup>Negative weights, when quoted, may be due to open security or capital stock trades at period end and/or unrealized loss on derivative positions as a percent of net assets at period end. Fund holdings subject to change without notice.

Morningstar Rating - Investor Class

Morningstar Category - Emerging Markets Bond	Overall	3 Year	5 Year	10 Year
Rating	***	***	***	-
# of Funds	224	224	209	-

The Morningstar Rating™ for funds, or star rating, is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

The J.P. Morgan Emerging Market Bond Index Global Diversified is a uniquely weighted USD-denominated emerging markets sovereign index. It has a distinct diversification scheme which allows a more even weight distribution among the countries in the index; the J.P. Morgan GBI-EM Global Diversified tracks the performance of bonds issued by emerging market governments and denominated in the local currency of the issuer. Information has been obtained from sources believed to be reliable, but J.P. Morgan does not warrant its completeness or accuracy. The Index may not be copied, used, or distributed without J.P. Morgan's prior written approval. Copyright 2024, J.P. Morgan Chase & Co. All rights reserved.

**Key Terms:**  
**Alpha:** Shows how a fund did relative to what would have been expected given the fund's beta and the performance of the benchmark index. For example, an alpha of 1.4 means that the fund outperformed its estimated return (based on market activity alone) by 1.4%.  
**Beta:** Measures the volatility of the fund, as compared to that of the overall market. The market's beta is set at 1.00; a beta higher than 1.00 is considered to be more volatile than the market, while a beta lower than 1.00 is considered to be less volatile.  
**Duration:** A weighted average of all bond durations in a fund's portfolio. Duration measures the price sensitivity of a bond or bond fund to changes in interest rates. Specifically, duration represents the approximate percentage change in the price of a bond or bond fund if interest rates move up or down 100 basis points.  
**R2 - (R-squared):** A statistic that indicates how much of a fund's fluctuations were attributable to movements in the fund's benchmark index.  
**Sharpe Ratio:** Measures the potential reward offered by a mutual fund relative to its risk level using the fund's standard deviation and its excess return to determine reward per unit of risk. The higher the sharpe ratio, the better the fund's historical risk-adjusted performance.  
**Standard Deviation:** Defines how widely returns varied from an average over a given period of time. A higher standard deviation means a more volatile fund. For example, a fund with a standard deviation of 6 and an average annual return of 10% saw annualized monthly returns fall within 6 percentage points of that average (or between 4% and 16%) two-thirds of the time.  
**Weighted Average Life to Maturity:** The average time in years to receive the principal repayments.
