

Emerging Markets Fund

Seeking Growth Opportunities in Companies Focused on Sustainability

Emerging Markets Fund is a fundamentally driven stock fund that seeks to outperform its benchmark through investments in accelerating, sustainable growth companies in the world's developing markets.

Distinct growth philosophy

Our distinctive growth philosophy centers on identifying companies experiencing early accelerating, fundamental improvement. Focusing on acceleration directs us to a different opportunity set than many competitors and gives us the potential for differentiated returns across market cycles.

Companies, then countries

Emerging markets remain highly fragmented with wide dispersion of returns among countries, sectors and individual securities. We recognize the macroeconomic environment's impact on companies, but incorporate it within our bottom-up, individual stock analysis. We believe that focusing on company fundamentals rather than country headlines helps build a high conviction portfolio.

Collaborative team approach

Our global and non-U.S. equity investment professionals apply the same philosophy and process and work in a single location where they meet and exchange information, contributing to a global picture of growth. The team meets daily to systematically gather information and make timely investment decisions. Our tight-knit and tenured team efficiently brings ideas into and out of the portfolio.

Active management has driven emerging market investment success

Emerging Markets are a diverse collection of countries, each with their own economic, political and cultural distinctions. These distinctions along with historically low analyst coverage create significant inefficiencies that can be exploited by the right manager.

Alpha: Shows how a fund did relative to what would have been expected given the fund's beta and the performance of the benchmark index. For example, an alpha of 1.4 means that the fund outperformed its estimated return (based on market activity alone) by 1.4%. **Upside Capture Ratio:** A measure used to evaluate how well an investment manager performed relative to an index during periods when that index has risen. Capture Ratios are calculated based off of 100. Upside Capture Ratio greater than 100 means the portfolio is capturing more positive returns than the index in the same up period. **Downside Capture Ratio:** A measure used to evaluate how well an investment manager performed relative to an index during periods when that index has fallen. Capture Ratios are calculated based off of 100. Downside Capture Ratio of less than 100 means the portfolio is capturing less negative returns than the index in the same period.

Average annual total returns for period ended 6/30/2023

	1 Year	3 Year	5 Year	10 Year	Inception	Expense Ratio
Emerging Markets	-2.34%	-2.56%	-1.78%	2.72%	5.09%	1.26%
MSCI Emerging Markets	1.75%	2.32%	0.93%	2.95%	-	-

Inception date is 9/30/1997. Expense ratio is as of the fund's current prospectus.

Extraordinary performance is attributable in part to unusually favorable market conditions and may not be repeated or consistently achieved in the future.

Returns or yields for the fund would have been lower if a portion of the management fee had not been waived. Review the annual or semiannual report for the most current information.
