

Focused International Growth Fund

A High-Conviction Approach to Growth Investing Abroad

The portfolio looks for opportunities in developed markets outside of the U.S. exhibiting compelling growth characteristics.

Distinct Growth Philosophy

Seeking to identify international large cap growth companies whose earnings power is being underestimated.

- A long-term, high-conviction international portfolio focused on stocks with accelerating, sustainable growth
- Uncovering inflection points in company and industry fundamentals early takes advantage of market inefficiencies
- Focusing on direction-of-growth leads to a broader opportunity set – agnostic to sector and industry

A Focused, High-Conviction Portfolio

Employing a focused investment approach – typically 35-50 high-conviction holdings. These “best ideas” drive long-term portfolio potential.

- Through a disciplined, bottom-up approach, focus on businesses with consistent risk exposures and varying ratings
- Provide an approach with the objective of maintaining low correlation of returns with peers
- Improve daily information exchange, decision making and insights through a collaborative, centralized team

Stock Selection Drives Performance

Focused on delivering performance primarily through stock selection - not from macro, country or sector effects.

- Portfolio risk profile and results driven by stock-specific factors
- Genuine environmental, social and governance (ESG) integration leads to sharper evaluation of risks and potential new opportunities
- Repeatable, bottom-up research process has resulted in performance driven by stock selection in various market environments

Focused International Growth has historically delivered compelling performance and effectively managed risk.

Attractive Risk-Adjusted Statistics vs. Peers

Data Represents a Five-Year Period through 3/31/2024

Past performance is no guarantee of future results.

Fund Percentile Ranks	1yr	3yr	5yr	Since Inception
Total Return	86	78	53	43
Alpha	83	79	51	45
Upside Capture	47	42	37	22
Downside Capture	18	20	38	33
# of Funds	407	383	330	264

Source: Morningstar Direct as of 3/31/2024. Data based on Investor Class. Rankings represented with Morningstar's Foreign Large Growth Category.

Alpha: Shows how a fund did relative to what would have been expected given the fund's beta and the performance of the benchmark index. For example, an alpha of 1.4 means that the fund outperformed its estimated return (based on market activity alone) by 1.4%. **Upside Capture Ratio:** A measure used to evaluate how well an investment manager performed relative to an index during periods when that index has risen. Capture Ratios are calculated based off of 100. Upside Capture Ratio greater than 100 means the portfolio is capturing more positive returns than the index in the same up period. **Downside Capture Ratio:** A measure used to evaluate how well an investment manager performed relative to an index during periods when that index has fallen. Capture Ratios are calculated based off of 100. Downside Capture Ratio of less than 100 means the portfolio is capturing less negative returns than the index in the same period.

Average annual total returns for period ended 3/31/2024 (%)	1 Year	3 Year	5 Year	10 Year	Inception	Gross Expense Ratio
Focused International Growth	7.09	-2.63	7.28	-	7.92	1.10%
MSCI ACWI ex-U.S.	13.26	1.94	5.97	-	-	-

Inception date is 3/29/2016. Expense ratio is as of the fund's current prospectus.

Extraordinary performance is attributable in part to unusually favorable market conditions and may not be repeated or consistently achieved in the future.

Calendar year returns (%)	2017	2018	2019	2020	2021	2022	2023	YTD
Focused International Growth	33.27	-13.20	32.47	31.79	7.86	-26.56	8.26	7.99

Data presented reflect past performance of Investor Class shares. Past performance is no guarantee of future results. Current performance may be higher or lower than the performance shown. To obtain performance data current to the most recent month end, please visit www.americancentury.com/performance. Investment return and fund share value will fluctuate, and redemption value may be more or less than original cost. Data assume reinvestment of dividends and capital gains. For information about other share classes available, please consult the prospectus. There is no guarantee the fund will meet its investment objective.

You should consider the fund's investment objectives, risks, and charges and expenses carefully before you invest. The fund's prospectus or summary prospectus, which can be obtained at americancentury.com, contains this and other information about the fund, and should be read carefully before investing.

Mutual fund investing involves market risk. Investment return and fund share value will fluctuate and it is possible to lose money by investing.

There is no guarantee that the investment objectives will be met. Past performance is no guarantee of future results.

Many of American Century's investment strategies incorporate the consideration of environmental, social, and/or governance (ESG) factors into their investment processes in addition to traditional financial analysis. However, when doing so, the portfolio managers may not consider ESG factors with respect to every investment decision and, even when such factors are considered, they may conclude that other attributes of an investment outweigh ESG considerations when making decisions for the portfolio. The consideration of ESG factors may limit the investment opportunities available to a portfolio, and the portfolio may perform differently than those that do not incorporate ESG considerations. ESG data used by the portfolio managers often lacks standardization, consistency, and transparency, and for certain companies such data may not be available, complete, or accurate.

Sustainable Investing Definitions

Integrated: An investment strategy that integrates sustainability-related factors aims to make investment decisions through the analysis of sustainability factors alongside other financial variables in an effort to make more informed investment decisions. A portfolio that incorporates sustainability factors may or may not outperform those investment strategies that do not incorporate sustainability factors. Portfolio managers have ultimate discretion in how sustainability factors may impact a portfolio's holdings, and depending on their analysis, investment decisions may not be affected by sustainability factors.

Sustainability Focused: A sustainability-focused investment strategy seeks to invest, under normal market conditions, in securities that meet certain sustainability-related criteria or standards in an effort to promote sustainable characteristics, in addition to seeking superior, long-term, risk-adjusted returns. Alternatively, or in addition to traditional financial analysis, the investment strategy may filter its investment universe by excluding certain securities, industry, or sectors based on sustainability factors and/or business activities that do not meet specific values or norms. A sustainability focus may limit the investment opportunities available to a portfolio. Therefore, the portfolio may underperform or perform differently than other portfolios that do not have a sustainability investment focus. Sustainability-focused investment strategies include but are not limited to exclusionary, positive screening, best-in-class, best-in-progress, thematic, and impact approaches.

Equity investments are subject to market fluctuations. International investing involves special risks, such as political instability and currency fluctuations. Investing in emerging markets may accentuate these risks.

Investing in a limited number of companies carries more risk because changes in the value of a single company may have a more significant effect, either negative or positive on the fund's value.
