

Socially Aware Large-Cap Investing

Sustainable Equity is a large-cap portfolio that seeks to deliver competitive long-term financial returns while integrating material ESG factors into the investment process.

Improvement & Sustainability

The team follows the philosophy that excess returns can be achieved by investing in companies with improving business fundamentals and sustainable corporate behaviors.

By considering environmental, social, and governance (ESG) issues combined with traditional financial information, the team gains a more complete view of value, risk and return potential of a company.

Comprehensive ESG Approach

The team leverages ESG research from multiple sources. In addition to utilizing third-party sources, the team combines quantitative analysis with insights from our fundamental team to develop a complete view of each company. This comprehensive approach provides a more holistic view of a company's ESG practices.

Risk-Aware Stock Selection

The team uses a dynamic risk management process focused on understanding and quantifying all portfolio risks. The aim is to reduce unintended risks, such as sector and industry concentrations, and to align the portfolio with stock-specific risk that the team believes will be rewarded over time.

Sustainable Equity has achieved above-average returns in addition to a competitive sustainability rating

Attractive Statistics vs. Peers

6/30/2016 – 12/31/2023

Fund Ranks	Annualized Return	Alpha	Batting Average	# of Funds
1 Yr	717	663	842	1,432
5 Yr	292	375	328	1,197
10 Yr	213	296	133	903

July 2016 represents the implementation of the current investment strategy focusing on tilting the portfolio towards ESG leaders and integration.

You should consider the fund's investment objectives, risks, and charges and expenses carefully before you invest. The fund's prospectus or summary prospectus, which can be obtained at americancentury.com, contains this and other information about the fund, and should be read carefully before investing.

Alpha: Shows how a fund did relative to what would have been expected given the fund's beta and the performance of the benchmark index. For example, an alpha of 1.4 means that the fund outperformed its estimated return (based on market activity alone) by 1.4%. **Batting Average:** A measure of consistency of returns representing the periods of a fund's outperformance divided by the total number of periods. The higher the batting average, the more consistent the fund has been in outperforming the benchmark.

Mutual fund investing involves market risk. Investment return and fund share value will fluctuate and it is possible to lose money by investing. Equity investments are subject to market fluctuations. The fund also may invest in foreign securities, which can be riskier than investing in U.S. securities.

Many of American Century's investment strategies incorporate the consideration of environmental, social, and/or governance (ESG) factors into their investment processes in addition to traditional financial analysis. However, when doing so, the portfolio managers may not consider ESG factors with respect to every investment decision and, even when such factors are considered, they may conclude that other attributes of an investment outweigh ESG considerations when making decisions for the portfolio. The consideration of ESG factors may limit the investment opportunities available to a portfolio, and the portfolio may perform differently than those that do not incorporate ESG considerations. ESG data used by the portfolio managers often lacks standardization, consistency, and transparency, and for certain companies such data may not be available, complete, or accurate.

ESG Definitions

- **ESG Integrated:** An investment strategy that integrates ESG factors aims to make investment decisions through the analysis of ESG factors alongside other financial variables in an effort to deliver superior, long-term, risk-adjusted returns. Therefore, ESG factors may limit the investment opportunities available, and the portfolio may perform differently than those that do not incorporate ESG factors. Portfolio managers have ultimate discretion in how ESG issues may impact a portfolio's holdings, and depending on their analysis, investment decisions may not be affected by ESG factors.
- **ESG Focused:** An investment strategy that focuses on ESG factors seeks to invest, under normal market conditions, in securities that meet certain ESG criteria or standards in an effort to promote sustainable characteristics, in addition to seeking superior, long-term, risk-adjusted returns. This investment focus may limit the investment opportunities available to a portfolio. Therefore, the portfolio may underperform or perform differently than other portfolios that do not have an ESG investment focus. ESG-focused investment strategies include but are not limited to impact, best-in-class, positive screening, exclusionary, and thematic approaches.

The Morningstar Sustainability Rating™ is intended to measure how well the issuing companies of the securities within a fund's portfolio holdings are managing their financially material environmental, social and governance, or ESG, risks relative to the fund's Morningstar Global Category peers.

The Morningstar Sustainability Rating calculation is a five -step process. First, each fund with at least 67% of assets covered by a company-level ESG Risk Score from Sustainalytics receives a Morningstar Portfolio Sustainability Score. The Morningstar Portfolio Sustainability Score is an asset-weighted average of company-level ESG Risk Scores. The Portfolio Sustainability Score ranges between 0 to 100, with a higher score indicating that a fund has, on average, more of its assets invested in companies with high ESG Risk.

Second, the Historical Sustainability Score is an exponential weighted moving average of the Portfolio Sustainability Scores over the past 12 months. The process rescales the current Portfolio Sustainability Score to reflect the consistency of the scores. The Historical Sustainability Score ranges between 0 to 100, with a higher score indicating that a fund has, on average, more of its assets invested in companies with high ESG Risk, on a consistent historical basis.

Third, the Morningstar Sustainability Rating is then assigned to all scored funds within Morningstar Global Categories in which at least thirty (30) funds receive a Historical Sustainability Score and is determined by each fund's Morningstar Sustainability Rating Score rank within the following distribution: High (highest 10%); Above Average (next 22.5%); Average (next 35%); Below Average (next 22.5%) and Low (lowest 10%).

Fourth, we apply a 1% rating buffer from the previous month to increase rating stability. This means a fund must move 1% beyond the rating breakpoint to change ratings.

Fifth, we adjust downward positive Sustainability Ratings to funds with a with high ESG Risk scores. The logic is as follows:

- If Portfolio Sustainability score is above 40, then the fund receives a Low Sustainability Rating
- If Portfolio Sustainability score is above 35 and preliminary rating is Average or better, then the fund is downgraded to Below Average
- If Portfolio Sustainability score is above 30 and preliminary rating is Above Average, then the fund is downgraded to Average
- If Portfolio Sustainability score is below 30, then no adjustment is made.

The Morningstar Sustainability Rating is depicted by globe icons where High equals 5 globes and Low equals 1 globe. Since a Sustainability Rating is assigned to all funds that meet the above criteria, the rating it is not limited to funds with explicit sustainable or responsible investment mandates.

Morningstar updates its Sustainability Ratings monthly. The Portfolio Sustainability Score is calculated when Morningstar receives a new portfolio. Then, the Historical Sustainability Score and the Sustainability Rating is calculated one month and six business days after the reported as-of date of the most recent portfolio. As part of the evaluation process, Morningstar uses Sustainalytics' ESG scores from the same month as the portfolio as-of date.

Sustainalytics is an independent ESG and corporate governance research, ratings, and analysis firm and is not an affiliated company of Morningstar.
