

U.S. Real Estate SMA

Investment Strategy

Uncovering compelling investment opportunities by investing primarily in U.S. real estate investment trusts (REITs) and companies engaged in the real estate industry with potential for strong price appreciation and attractive valuation.

Key Differentiators

- Growth, income and diversification opportunity
- Pairing top-down and bottom-up investment process
- Tenured team navigating this dynamic and specialized universe

Data presented reflects past performance. Past performance is no guarantee of future results. Current performance may be higher or lower than the performance shown. Investment return and share value will fluctuate, and redemption value may be more or less than original cost. Data assumes reinvestment of dividends and capital gains. Returns for periods less than one year are not annualized.

DUE TO MARKET VOLATILITY, CURRENT PERFORMANCE MAY BE DIFFERENT THAN THE FIGURES SHOWN.

U.S. Real Estate Equity SMA net of fee shown is equal to the highest anticipated wrap fee charged by a program sponsor (3.00% annually which is inclusive of up to a maximum investment advisory fee of 0.70%). This total wrap fee includes all charges for trading costs, portfolio management, custody and other administrative fees. Actual fees may vary depending on, among other things, the applicable fee schedule and portfolio size.

Investment Philosophy

- Combine top-down property sector allocation with bottom-up security selection
- Rotate geographic regions and property sectors based on economic/regional fundamentals and relative valuations
- Diversify by property sector and focus on securities within the benchmark
- Seek companies with superior growth and attractive cash flow multiples
- Invest in companies with value-added management, protected markets, economies of scale, and balance sheet strength.

Investment Process

STEP 1

Combining top-down analysis with bottom-up security selection gives us the potential to outperform in a variety of market environments.

Public Real Estate Universe
Approx. 120 investable companies

Top-Down Regional /Property Sector Analysis

- Real Estate-Specific
 - Valuation assessment
 - Real Estate Market Fundamentals
- Macro-Economics
 - Economic Outlook
 - Policy Expectations

STEP 2

Diversified	0.00	1.83
Self Storage	5.20	7.05
Office	1.36	5.01

A Note About Risk

Due to the limited focus of this fund, it may experience greater volatility than funds with a broader investment strategy. It is not intended to serve as a complete investment program by itself. This fund may be subject to many of the same risks as a direct investment in real estate. These risks include changes in economic conditions, interest rates, property values, property tax increases, overbuilding and increased competition, environmental contamination, zoning and natural disasters. This is due to the fact that the value of the fund's investments may be affected by the value of the real estate owned by the companies in which it invests. To the extent the fund invests in companies that make loans to real estate companies, the fund also may be subject to interest rate risk and credit risk. The fund is classified as non-diversified. Because it is non-diversified, it may hold large positions in a small number of securities. To the extent it maintains such positions; a price change in any one of those securities may have a greater impact on the fund's share price than if it were diversified. There is no guarantee that the investment objectives will be met. Dividends and yields represent past performance and there is no guarantee that they will continue to be paid. The information is not intended as a personalized recommendation or fiduciary advice and should not be relied upon for investment, accounting, legal or tax advice.

Separately Managed Accounts (SMAs) are investment services provided by American Century Investment Management, Inc. (ACIM) a federally registered investment advisor. SMAs are not available for purchase directly through ACIM. Client portfolios are managed based on investment instructions or advice provided by the client's advisor or program sponsor. Management and performance of individual accounts may differ from those of the model portfolio as a result of advice or instruction by the client's advisor, account size, client-imposed restrictions, different implementation practices, the timing of client investments, market conditions, contributions, withdrawals and other factors.

The investment strategies described herein are those of American Century Investments. These materials are being provided for illustrative and informational purposes only. The information contained herein is obtained from multiple sources that are believed to be reliable. However, such information has not been verified, and may be different from the information included in documents and materials created by the sponsor firm in whose investment program a client participates. Some sponsor firms may require that these American Century Investments materials are preceded or accompanied by investment profiles or other documents or materials prepared by such sponsor firms, which will be provided upon a client's request. For additional information, documents and/or materials, please speak to your Financial Advisor.

This strategy may not be suitable for all investors.

The FTSE Nareit All Equity REITs Index is a free-float adjusted, market capitalization-weighted index of U.S. equity REITs. Constituents of the index include all tax-qualified REITs with more than 50 percent of total assets in qualifying real estate assets other than mortgages secured by real property.

Key Terms: Weighted Average Market Capitalization: The average of the weighted capitalizations of a portfolio's holdings. **Price/Earnings Ratio (P/E):** The price of stock divided by its annual earnings per share. **Price/Book Ratio (P/B):** The ratio of a stock's price to its book value per share. **Price/Cash Flow Ratio:** The ratio of a stock's price to its cash flow per share. **Standard Deviation:** Defines how widely returns varied from an average over a given period of time. A higher standard deviation means a more volatile portfolio. For example, a portfolio with a standard deviation of 6 and an average annual return of 10% saw annualized monthly returns fall within 6 percentage points of that average (or between 4% and 16%) two-thirds of the time. **Dispersion:** A measure of the amount of uncertainty and risk associated with a portfolio.
